

Quality, Research, and Public Health Domain				
Profile Acronym	Profile Name	Status	Profile Description	Link to Wiki Page
ADX	Aggregate Data Exchange	Trial Implementation	Is a Content Module profile which allows for the representation of reported public health data. It will most typically be used to represent routinely reported aggregate data such as the numerators and denominators which can be used in the construction of public health indicators."	
BFDR-E	Birth and Fetal Death Reporting - Enhanced	Trial Implementation	Captures and communicates information for birth and fetal death reporting for vital registration purposes.	<a href="http://wiki.ihe.net/index.php?title=Birth_and_Fetal_Death_Reporting_Enhanced_Profile">http://wiki.ihe.net/index.php?title=Birth and Fetal Death Reporting Enhanced Profile</a>
CRD	Clinical Research Document	Trial Implementation	Describes the content pertinent to the clinical research use case required within the Retrieve Form for Data-Capture (RFD) pre-population parameter.	<a href="http://wiki.ihe.net/index.php?title=Clinical_Research_Document">http://wiki.ihe.net/index.php?title=Clinical Research Document</a>
CRPC	Clinical Research Process Content	Trial Implementation	Specifies content, which is appropriate to help automate the sharing of information among systems during the clinical research process using the transactions from the Retrieve Process for Execution (RPE) profile. Using the transactions from the Retrieve Process for Execution (RPE) profile, CRPC will improve the recruitment for, setup, and performance of clinical studies.	<a href="http://wiki.ihe.net/index.php?title=Clinical_Research_Process_Content">http://wiki.ihe.net/index.php?title=Clinical Research Process Content</a>
DEX	Data Element Exchange	Trial Implementation	Adds mapping metadata to an annotated data capture form at the point of form design instead of the exchange of data instances.	<a href="http://wiki.ihe.net/index.php?title=Data_Element_Exchange">http://wiki.ihe.net/index.php?title=Data Element Exchange</a>
DSC	Drug Safety Content	Trial Implementation	Describes the content pertinent to the drug safety use case required within the Retrieve Form for Data-Capture (RFD) pre-population parameter.	<a href="http://wiki.ihe.net/index.php?title=Drug_Safety_Content">http://wiki.ihe.net/index.php?title=Drug Safety Content</a>
EHDI	Early Hearing Detection and Intervention	Trial Implementation	Defines a new Hearing Plan of Care document (HPoC) which replaces the earlier Early Hearing Care Plan (EHCP) and defines the message content for a hearing screening device to communicate results to a receiving system.	<a href="http://wiki.ihe.net/index.php?title=Early_Hearing_Detection_and_Intervention">http://wiki.ihe.net/index.php?title=Early Hearing Detection and Intervention</a>
FP	Family Planning	Trial Implementation	Describes the use of ITI's RFD to report encounter-level family planning clinical visits. The profile describes the basic data elements that are needed to report quality metrics, a new Family Planning Pre-pop document in alignment with PCC conventions, and maps the data elements to CDA (consisting of the Header, Pregnancy History, Pregnancy Status Review, Coded Vital Signs, Coded Social History, Coded Care Plan, and Coded Results sections).	<a href="http://wiki.ihe.net/index.php?title=Family_Planning">http://wiki.ihe.net/index.php?title=Family Planning</a>

HW	Healthy Weight	Trial Implementation	Supports electronic information capture and exchange for managing and monitoring healthy weight among clinical systems and public health surveillance systems	<a href="http://wiki.ihe.net/index.php?title=Healthy_Weight">http://wiki.ihe.net/index.php?title=Healthy_Weight</a>
NANI	Newborn Admission Notification Information Summary	Trial Implementation	Describes the content needed to communicate a timely newborn admission notification to public health to be used by Early Hearing Detection and Intervention (EHDI) screening programs.	<a href="http://wiki.ihe.net/index.php?title=Newborn_Admission_Notification_Information">http://wiki.ihe.net/index.php?title=Newborn_Admission_Notification_Information</a>
PRPH-Ca	Physician Reporting to Public Health - Cancer Registry	Trial Implementation	Defines data elements retrieved from the EMR and transmitted to the cancer registry or to a healthcare provider.	<a href="http://wiki.ihe.net/index.php?title=Physician_Reporting_to_a_Public_Health_Repository_%E2%80%93_Cancer_Registry">http://wiki.ihe.net/index.php?title=Physician_Reporting_to_a_Public_Health_Repository_%E2%80%93_Cancer_Registry</a>
QME-EH	Quality Measure Execution - Early Hearing	Trial Implementation	Captures patient-level data to electronically monitor the performance of early hearing-loss detection and intervention (EHDI) initiatives for newborns and young children.	<a href="http://wiki.ihe.net/index.php?title=Quality_Measure_Execution-Early_Hearing">http://wiki.ihe.net/index.php?title=Quality_Measure_Execution-Early_Hearing</a>
RM	Research Matching	Trial Implementation	Publishes research process definitions to EHR systems to match patients and investigators with appropriate research studies.	<a href="http://wiki.ihe.net/index.php?title=Research_Matching">http://wiki.ihe.net/index.php?title=Research_Matching</a>
RPE	Retrieve Process for Execution	Trial Implementation	Accesses a process definition, such as a research protocol, and executes automated activities without leaving an EMR session.	<a href="http://wiki.ihe.net/index.php?title=Retrieve_Process_for_Execution">http://wiki.ihe.net/index.php?title=Retrieve_Process_for_Execution</a>
SDC	Structured Data Capture	Trial Implementation	Utilizes the IHE Retrieve Form for Data Capture (RFD) profile for retrieving and submitting forms in a standardized and structured format. This supplement is based on the work of the US Office of the National Coordinator for Health Information Technology, Standards & Interoperability (S&I) Framework SDC Initiative.	<a href="http://wiki.ihe.net/index.php?title=Structured_Data_Capture">http://wiki.ihe.net/index.php?title=Structured_Data_Capture</a>
VRDR	Vital Records Death Reporting	Trial Implementation	Defines a Retrieve Form for Data Capture (RFD) content profile that will specify derivation of source content from a medical summary document. by defining requirements for form filler content and form manager handling of the content.	<a href="http://wiki.ihe.net/index.php?title=Vital_Records_Death_Reporting">http://wiki.ihe.net/index.php?title=Vital_Records_Death_Reporting</a>
